

Promed Mail

Promed is an electronic listserv used to communicate real-time disease information worldwide. There is no charge to subscribe. Subscribers can choose to receive all postings, a daily consolidation of postings (“promed-digest”), and postings specific to certain disease topics, such as emerging diseases or zoonotic diseases. Promed postings are also available in Spanish and Portuguese. Subscribers can unsubscribe at any time. There is no “vacation” feature, so for long-term absences, subscribers should unsubscribe and then resubscribe after their return.
